ISACA Research "The State of Cybersecurity 2019"

Peter Gwee Ban Hock, CISA, CISM, CRISC, COBIT Member, Assistant Secretary, ISACA Singapore Chapter Team Manager, Cyber Advisory, ST Electronics (Info-Security) Cybersecurity Systems Group, ST Engineering

Peter Gwee has over 18 years of functional experience by providing a wide range of Enterprise security and technology consulting services to clients across the region, with a deep understanding of security technology and services fundamentals, which enables him to recognize the challenges with information security management. Peter Gwee has over 18 years of functional experience by providing a wide range of Enterprise security and technology consulting services to clients across the region, with a deep understanding of security technology and services fundamentals, which enables him to recognize the challenges with information security management.

Peter has operated in the frontlines as an information security practitioner, having covered the cyber operations in the war room of public sector organisations as well as served in incident response teams to support public events.

As a seasoned professional in the know of cybersecurity threat actors and understanding how they operate, Peter has evolved the known landscape of cyber risk and have authored national-level cyber threat reports with insights into emerging threats against industrial cyber-physical information systems.

Peter's experiences have enabled him to design, deploy and assess effective cyber strategies and critical security controls, as well as provide guidance to investigate and respond to incidents where controls may have been breached and sensitive information compromised.

Peter's current role focuses on employing best practice audit methodologies and being a trusted business partner to ST's other functional areas to bring about positive changes to industrial control environment from the cyber perspective.

Prior to joining ST Engineering, Peter was the security lead for managed security service delivery at e-Cop and had gained experience early in his career in technology at Singapore Airlines' pilot training facilities. Peter earned a BEng degree from the University of Western Australia, specializing in Software Engineering. Peter also holds certifications GIAC Security Essentials Certification (GSEC) & GIAC Critical Controls Certification (GCCC).
